

Build your career in Telecommunications and Technical Security with Integracom Training Solutions

Consider a career in Telecommunications

Telecommunications is a general term for a vast array of technologies that send information over distances. It encompasses such technologies as Mobile phones, land lines, satellite phones, Computer Networks and voice over Internet protocol (VoIP).

With an estimated value of \$1.2 trillion dollars in 2006, Telecommunication is an important part of the world economy. It was one of the fastest growing industries in the last century and will continue to grow exponentially into the future.

Integracom have training pathways mapped out allowing new trainees to become part of the construction industry at a technical Level.

A career in this industry is not only challenging but consistent as technology

that relies on communications is now so engrained into our daily life that life without mobile phones and the internet is almost unthinkable.

Integracom Training Solutions provides Telecommunications training including: Open Registration (cabling License), Optical Fibre, Structured Cabling and Network Design courses.

These courses have been approved by the BCITF and attract an 80% subsidy for persons currently working in the construction industry.

To check if you are eligible contact Carl on 08 9355 5770.

Pursue a career in Technical Security

An electronic Security system is a mission critical service installed in both domestic and commercial buildings to not only protect property but to safeguard lives as well.

It is an industry manned by dedicated individuals and companies who are of the highest calibre and work diligently to provide a service that should not be compromised.

Being part of that industry requires an individual to undertake his/her responsibility with a high degree of professionalism.

- Technical Security encompasses such areas as:
- Intruder Alarm Systems
 - CCTV Systems
 - Access Control Systems
 - Fire Alarm Systems
 - Perimeter Protection
 - Remote Monitoring of Mission Critical Infrastructure
 - Panic Attack and Medical Alert Systems

Nurture a passion for an exciting career
