

ICTTC 136B Restricted Registration

Part of the ICT 02
Certificate II in Telecommunications Cabling

ICTTC 136B ACMA Restricted Registration Cabling Course

Course Outline:

The **Restricted Registration** training course is a Telecommunications and Extra low Voltage cabling Installation Course and is defined under the Australian Qualifications Training Framework. (ATQF)

It is a mandatory prerequisite course for technicians who wish to install additional telephone points in a domestic installation.

It is also a prerequisite for technicians who wish to install cabling for security, fire, access control and CCTV systems.

What it does **not** Cover

1. Terminating on an MDF or any cross connect.
2. Smart Wiring systems such as STARSERVE.
3. Terminating onto patch panels.
4. Underground cabling in public areas
5. Aerial cabling in public areas.
6. Sharing services on a power pole.
7. Installing services in a HV Enclosure.
8. Terminating a telecommunications connection for a security or fire alarm system in a commercial building.

In order to carry out any of the above activities a technician must hold an Open Registration.

For information relating to the Open Registration click on the link below
